Dear Friends,

Thanks for the message.

I would like to give a small brief about the projects in the last 7 months period:

- Since March last week India is under lockdown and since Sep first week there are lot of relaxations.
- All projects are suspended due to coronavirus lockdown as per the government instruction
- But we were fully involved in the corona relief works right from the March 2nd week (even before the lockdown)
- So far we have distributed over 275,000 surgical masks to the health professionals, police, sanitary workers and some public too
- Food supplies given to over 100 families so far
- More than 5,000 litres of sanitisers was prepared by us and delivered to government hospitals and police
- Medicines, equipments, sanitizer dispensers, gloves, PPE, surgical caps were also distributed to various government hospitals
- Mobile library was converted as a awareness vehicle for nearly three months
- Foreigners help desk helped for almost 5 months for the foreigners who got stranded here (no money was spent for this but tremendous support was given to the stranded tourists)
- Mobile clinic medical team worked together with the government health department for over 4 months

Evening schools:

Evening schools are remain closed as per the government instruction since March. But we are in close contact with every student and asking them if they need any help. Food supplies also given to the needy families. Now we are planning to give a bag to all students (containing color pencils, pen, pencils, papers, notebooks, story book, crayons, work sheets and other materials) so that the students can do some activities at home as per the instructions of their evening school teachers.

Mobile Clinic:

Mobile clinic team is not working in the field since August last week. But now we are offering some treatments at office whoever comes there. Pharmacist and driver are working at the nursery, parks and office garden since there is no other works to do. Nurse is taking care of the people whoever is coming to office for medical treatments.

Parks:

Both parks are remain closed. But there are lot of works are going on in Science Park. The Chief Minister visited the Science park last week and so the regular maintenance works are going on at both parks.

ESP:

New admissions are going on under this project. Children's school and some colleges are also asking for fees since they conduct online classes.

Mobile library:

Mobile library also remain closed since March. Over 5,000 books are with the students which was given to them before the covid lockdown. Our team went to the student's houses and could be able to collect only around 2,000 books. So the rest has to be collected from them by the last week of

September when the students comes to their school. Probably then we may start the library project in a small phase.

In general, the coronavirus is spreading here very faster and every day the numbers are growing like anything. Already over 5 million people are infected and many deaths also happened. I think by end of October it will reach the peak and that time we may have to step in again in full speed to support the people and medical professionals.

It is very difficult time for everyone here. We are trying our level best to support the community in many ways. I am so grateful to ARS for your great support and please accept my sincere thanks for your great support!!!

Will send some pictures through WhatsApp in the group so that all can see Peter.

Please let me know if you need any further details regarding this.

Lots of love,  
Madhan
