Product Spotlight: OsmoTECH® XT

"The instrument is very easy and has the capability to be used as an R&D instrument or for a QC lab with its GXP compliant interface. The system has excellent accuracy and precision, even between different analysts. The great thing about the XT model is that it can measure a broad range of sample osmolality to cover all of our sample needs." - Will Heaton, DiscGenics.

Can You Improve Your Upstream Processing Using Osmolality?

Advanced Instruments provides trusted osmometers to help you meet the demand. Electrolyte disorders in COVID-19 patients demonstrate the importance of osmolality testing in monitoring and managing these patients. This simple and cost-effective test is now being used worldwide to help manage patient treatments.

UPCOMING EVENTS

Keep an eye out for us at the following upcoming industry events!

- Unveiling Exciting New Data from Catapult Showing Osmolality Improves Quality & Yield for Viral Vector Manufacturing - July 8th
- Bioprocessing Summit - Boston - August 16th - 19th
- 4th China Pharmaceutical Quality Summit - Suzhou - August 25th - 27
- BioProcessing International - Boston - September 20th - 23rd
- Formulation & Delivery UK - London - September 21st - 22nd
